Aaditya Prakash (Adi)

iamaaditya.github.io, aprakash@brandeis.edu
Blog 🔊, Github ⌂, LinkedIn in, Twitter 🐦

RESEARCH	Current: Memory Networks for transfer learning, Applications of GANs	
	Past : Paraphrase Generation ↗ , Applications of Memory Networks in NLP ↗	Advisor: Sadid Hasan
	Semantic Image Compression using CNN↗ , Visual Question Answering ↗	Advisor: James Storer
	Computational Fact Checking with Retrospection ↗	Advisor: Liuba Shrira

EDUCATION

PhD, Computer Science, Brandeis University. Advisor: Prof. James Storer ↗ — expected 2018

MA, Computer Science, Brandeis University. — May 2015
Courses: Algorithms, Distributed Systems, Statistical approaches to NLP — GPA = 4.0/4.0
Computational Semantics, Computational Neuroscience, Information Retrieval

BS, Biomedical Engineering, Bharath University, Chennai, India — 2004-2008
Courses: Calculus(I, II), Complex Analysis, Numerical Methods, Digital Signal Processing — GPA = 9.36/10
Biostatistics, Medical Physics, Medical Imaging Lab, Modeling of Physiological Systems — Rank = 1/71

Completed 24 MOOC courses from Coursera, Udacity, edX, Harvard Business School — Certificates ↗
Machine Learning (Ng), Game Theory, Algorithms, Neural Networks (Hinton), AI (Abbeel)

COMPUTING SKILLS

Languages	:	C, Python, C++, CUDA, Matlab
Deep Learning	:	TensorFlow, Keras, Theano, Torch
Research Tools	:	iPython, SciPy, NumPy, NLTK, OpenCV, Git, LaTeX
Big Data Tools	:	Hadoop, MapReduce, MongoDB, Mahout, Spark
Code Samples	:	VQA [Keras] ↗ , Multi-structure ROI [Tensorflow] ↗ , Fallacy Detector [Haskell] ↗

EXPERIENCE

- Deep Learning Developer (Contract), Spin Master™, Canada — Oct-Dec 2016
  - Designed CNN models for fine grained classification of various toys
  - Developed Android app for classification/detection in real-time

- Research Intern, AI Labs, Philips Research, Cambridge, MA — Summer 2016
  - Explored applications of LSTM in sequence to sequence learning
  - Developed efficient representation of memory state for Memory Networks

- Teaching Assistant, Brandeis University — 2013-current
  - Mobile Application Development   - Fundamentals of Artificial Intelligence
  - Introduction to Big Data Analysis   - Scientific Data Processing in MATLAB
  - Introduction to Algorithms   - Theory of Computation
  - Data Structures   - Data Compression & Multimedia

- Big Data Analyst, Brandeis University — Summer 2014
  - Researched various new techniques in data analysis on Hadoop and Spark framework.
  - Designed assignments and quizzes for a graduate level course.

- Independent Algorithmic Trading   2010-2012
  - Statistical Arbitrage trades on co-integrated pairs.
  - Designed and formulated low latency strategies on butterfly spread options
  - Designed, developed and coded several algorithmic formulas on a contract basis

- Senior Systems Engineer, Infosys Limited ⬈ , Pune, India   2009-2013
  - Developed new algorithm to visualize large unstructured datasets
  - Implemented various Machine Learning algorithms on MapReduce and CUDA
  - Analyzed various fault measures in distributed optimization problems
  - Debug and support of Banking Software implemented across major banks.

- Independent Tutoring, Bharath University ⬈   2007-2009
  - Courses taught: C, C++, Java, Maths [I, II, III, IV], Computer Architecture.
  - Taught more than 150 students, batch size ranging from 2 to 15

AWARDS
- Advisory board member, OneQube
- Honorable spotlight award, Visual Question Answering Challenge, CVPR 2016 ⬈
- Best paper award at International Conference on Perspective of Computer Confluence, Pune 2012
- Gold Medal for being university topper, Bharath University, Chennai 2008
